

DryLab System

ULTIMATE DRYLAB SOFTWARE FOR ANY PRINTER

- ✓ **Squeeze as much as you can out of your printer.**
- ✓ **Work on the level of a professional drylab but for a fraction of the price.**
- ✓ **Extend functionality beyond the capabilities of your printer driver.**
- ✓ **Control ink levels, media counters, total prints and more.**

BEYOND YOUR PRINTER DRIVER

DLS provides functionalities that can't be found in standard printer drivers, like precise alignment for perfect borders. Thanks to native support for particular printers it also unlocks features normally not available, like extended status control and panoramas for Citizen and DNP printers.

INSTANT CORRECTIONS & PRINTS

DLS is designed for the quick processing and high-volume printing of photos with minimal effort. Seamless instant color corrections and limitless cropping on single photos or whole groups makes DLS a perfect everyday solution. Ideal for use in photo laboratories as well as studio shoots.

CONTINUOUS WORKFLOW

DLS's edits are non-destructive. You can recall photos from the built-in archive, change corrections and manipulate photos as many times as you need. All operations are performed without modifying the original file. In this manner DLS is similar to RAW editing software.

3 versions for different needs

▷ Basic

This essential version is for users that would like to take full advantage of their printers and get the speed and comfort of work comparable to a professional drylab.

- + Dedicated to a single printer
- + Prints up to: 21x30 cm (A4)

▷ Standard

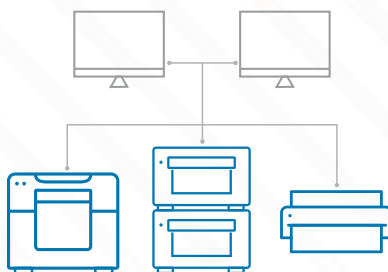

Our bestseller! Now with native support for selected printers that allows users to unlock completely new functionalities.

- + Dedicated to a single printer
- + Prints up to: 100 cm paper length
- + Optimization for high resolution InkJet printers
- + Native support for Fujifilm Frontier-S DX100, Epson SureLab SL-D700, all Citizen and DNP printers
- + Ink levels, current state, media counters, total prints and more
- + Panorama for DNP DS620 and Citizen CX-02
- + Hot folder feature with optional overlay frames

▷ Pro

The most developed version, which supports multiple local and network printers at the same time. Capable of grouping different printers into a virtual single unit to accelerate the speed of printing.

- + All features included in the Standard version
- + Up to 8 local or network printers
- + Up to 9 graphic stations
- + Automatic print-job splitting between multiple printers of the same model
- + Support for non-Windows devices like digital minilabs
- + Output to file with a customizable system of file naming and folder structuring

Key features

Instant color corrections: Y, M, C, D as well as saturation, gamma, contrast, sharpness and levels

Stepless cropping and rotation for seamless image alignment

Automatic corrections for brightness and contrast. Optional Color Science I2E advanced plugin

Overlay frames, customizable borders and colored backgrounds

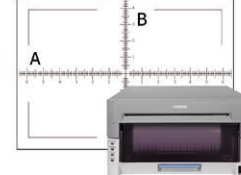

Multiple printing modes: single picture, index print, timestamping and panoramas

Automatic order archiving on up to 1000 orders in a non-destructive editing workflow

Color management with support for all kinds of V2 and V4 ICC profiles including embedded ones and soft proofing on the screen

Precise printer alignment and DPI control guarantee perfect borders, accurate image cropping and smooth photo edges
