## \_PORTABLE *robotic workstation*

The \_CASE is a compact and portable device which can be used in any photo studio, online shop, warehouse or production hall. It can be packed/unpacked and transported to where it's needed within a few minutes.

Photographers and operators can increase their efficiency by creating product and 360° photographs while maintaining high image quality.

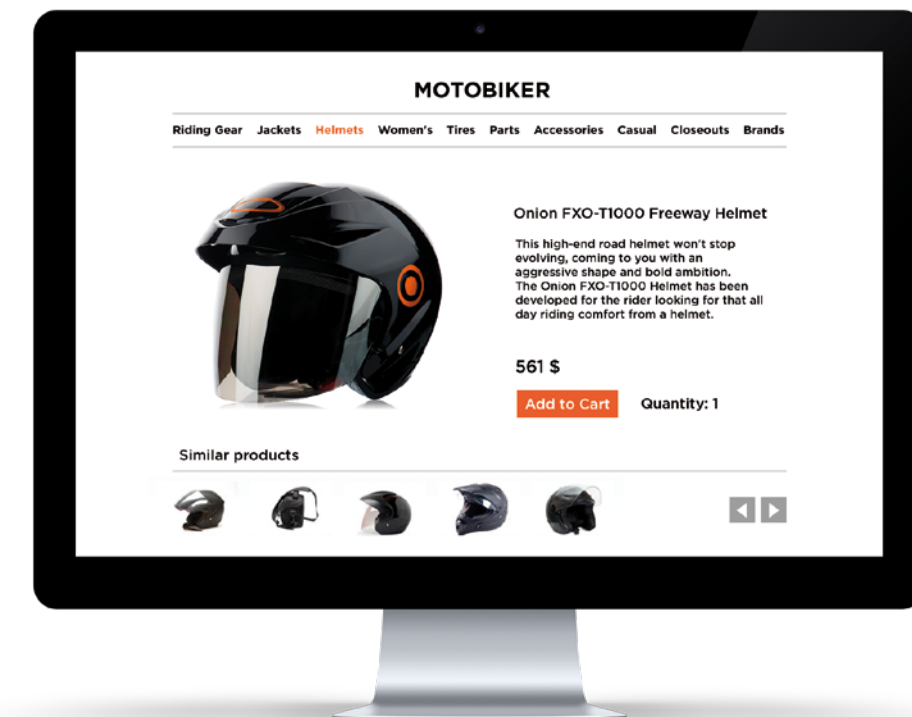

— *Product is shown without a background, which is included in the package.*

— The compact dimensions of the pack make it possible to transport **\_CASE** in your car. 850 mm in diameter, the plate provides a sufficiently large work surface.

**\_CASE** | **Cs**

## **\_EASY WORK WITH LIGHT**

Optical glass plate and diffuse background enable the photographed object to be lit from all sides. The **\_CASE** can therefore naturally create quality photographs on a pure white background.

Its simple user interface and wide range of smart functions, such as automatic background removal, provide an easy solution for automating product photography. Anyone can create an excellent spin photograph within a few seconds.

\_CASE | Cs

*\_Portable design*  
*\_Quality manufacturing*

**\_CASE. PRODUCT PHOTOGRAPHY ANYWHERE, ANY TIME.**

*— Mobile workstation, everything can be packed into a single case.*

**\_CASE | Cs**

THE WEB INTERFACE OF THE CONTROL UNIT ENABLES THE MACHINE TO BE CONTROLLED USING A WEB BROWSER FROM THE DESKTOP, LAPTOP, TABLET OR MOBILE PHONE

ROTATION BY 360° IN 2.1 s

BUILT-IN CROSS LASER TO FACILITATE FINDING THE CENTRE OF ROTATION

FOLDING LEGS FOR INCREASED STABILITY

THE DIFFUSE BACKGROUND IS CONVENIENTLY FOLDED INTO THE \_CASE'S LID AND ENABLES THE USER TO EASILY CREATE A PURELY WHITE BACKGROUND FOR THE PHOTOGRAPH WITHOUT THE NEED FOR POST-PRODUCTION.

SHUTTER RELEASE CONTROL

850 mm DIAMETER PLATE MADE FROM HARDENED, HIGH-TRANSPARENCY OPTICAL GLASS, PRECISELY POSITIONED IN A SYSTEM OF PULLEYS FOR ACCURATE RUNNING

— Build a studio within 15 minutes  
exactly where you need it.

## \_SINGLE SOFTWARE PRODUCT TO CONTROL THE ENTIRE STUDIO

PhotoRobot **\_CONTROLS** software suite, boasting a modern intuitive design, is the best comprehensive studio management available on the market. It is used to remotely control the entire workplace (robots, cameras, lighting), manage workflow and provide the necessary functionality for effective automation in the field of post-processing.

Using **\_CONTROLS** saves you time while also giving you an advantage over the competition thanks to its higher quality image output.

**\_CONTROLS** is multi-platform and mobile - whether you use MacOS, Windows or Linux, iOS, Android or Windows Mobile.

✳ *The availability of features depends on which programme version is used.

## \_QUALITY IS KEY

PhotoRobot devices are made by people who also use them.

They therefore know very well that only well designed things can do a lot of complex work for us and still be simple to use. Only then can we achieve the highest efficiency.

Our goal is to continuously improve.

PhotoRobot devices are the result of ceaseless internal development. We make sure that our robots are user-friendly yet last long even under high load. That is why we have chosen a heavy-duty design. All parts are made in the EU.

We guarantee quality.
